

OUR BUSINESS IS KEEPING YOUR BUSINESS CONNECTED

Small business or large enterprise,
TWN has a broadband solution for you.

TWN COMMUNICATIONS ADVANTAGE

Priority Service. We promise to make your business a priority! Besides 24/7 network monitoring and support, business customers receive priority service calls, most of the time same day or within one business day. Rest assured that TWN is working hard to keep your company connected.

Dedicated IP Address. Having a static IP address is important for stability and accessibility. Make it easy for computers to reach your server from anywhere, so your customers can access your website faster. Maintain a VPN for remote employees, facilitate server hosting, device connectivity, and streamline your administrative duties.

Managed Network Services. Count on TWN for the infrastructure, software, and technical support required to keep your organization's network operating seamlessly. We'll handle enterprise networking issues, such as integration, monitoring, troubleshooting, and policy setting. Let us help cost-effectively improve your business's efficiency and availability.
